

**Bio-Rad Laboratories ChemiDoc Go Imaging System**  
**Specifications**

| Item                   |                                                           |
|------------------------|-----------------------------------------------------------|
| Supported applications | Chemiluminescence and colorimetry                         |
| Max imaging area       | 21 x 14 cm                                                |
| Excitation source      | Trans-UV, Trans-blue, Trans-amber, Epi-UVA, and Epi-green |
| Emission filters       | 520/260 BP, 590/110 BP, 695 LP                            |
| Filter selector        | Auto-selection                                            |
| Dector                 | 20.48 MP BSI (back-side illuminated)<br>CMOS              |
| Sample tray            | UV/Stain-Free tray                                        |
